Resident and Commuter Camps
For Boys and Girls Ages 9-18

CAMP INFORMATION

Resident campers MUST be 12 years old to spend the night.

Refund Policy
Camps unable to attend camp are entitled to a refund. A $55 administrative fee (only $30 if you enrolled online) will be deducted from all refunds, regardless of the reason. Refund requests must be submitted in writing PRIOR to the first day of the camp session in which the camper was originally enrolled. No refunds for any reason (i.e. injury, illness) will be given once a camper is on campus.

Medical Policy
Each participant should have his or her own medical insurance. A student trainer will always be available. Participants are automatically enrolled in MSU’s accident insurance plan. Eligible covered expenses will be paid only if they are in excess of other valid and collectible insurance. No physicals are required.

Check-In/Check-Out
Time and location of check-in/check-out will be printed on your receipt and sent to you at time of payment.

REGISTRATION INFORMATION

Register online at www.sportcamps.msu.edu or complete the attached application. Full payment by either check, MasterCard, VISA, Discover or American Express must accompany the application. Make checks payable to Michigan State University. No applications will be accepted before February 1st. You will receive confirmation for receipt of enrollment by mail within 12-15 business days.

Walk-In Registration Policy
Walk-in registration (signing up on the day camp begins) will be accepted on a space available, first come, first served basis. An additional $10.00 fee will be charged for walk-in registrations. Please note that walk-ins are not guaranteed admission once a camp is full. Cash payment only. No checks or credit cards.

MSU Sport Camp Policy
Persons enrolled in MSU Sport Camps will be required to attend all sessions and to comply with the rules and regulations of Michigan State University governing the conduct of all students on the campus.

Did you know?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

**What is a concussion?**

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

**What are the signs and symptoms of concussion?**

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

Symptoms reported by athlete:

- Headache or “pressure” in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not “feeling right” or is “feeling down”

Signs observed by coaching staff:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can’t recall events prior to hit or fall
- Can’t recall events after hit or fall

“It’s better to miss one game than the whole season”
CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it’s OK to return to play.

2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete’s brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.
